

HOW TO BUILD A ROBUST CLOUD BUSINESS CASE

The Business Case is the foundation of any Cloud Transformation. This outlines your plan to ensure:

- Investment is received
- The executive team are on board (creating a guiding coalition)
- The overarching business strategy is clearly thought through

Key considerations for building a Business Case

Break down the Business Case

Map out key transition stages and individual Business Cases, rather than a broad 3-5 year plan.

Involve the Executive Team

The Executive Team need to assess the tangible and intangible benefits on their business processes, their teams and their organisation

Cost-impact of ongoing change

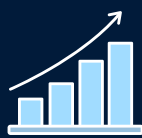

Costs need to be calculated based on the end-to-end business processes.

Engagement/collaboration

Note the organisation-wide engagement and collaboration, between all business functions and IT teams.

Characteristics of a cloud transformation business case to be addressed

Commercial Model

Cyber Security

Capability Uplift

Appropriate Cloud Skills
